PROFILE

Computer Science and Information Technology Engineering graduate from Universidad del Bío-Bío. I build end-to-end web applications with React, Next.js, TypeScript, Node.js and PostgreSQL. I also build, configure and maintain websites with WordPress. Experienced in gathering requirements from users, data modeling, REST API development, role-based authentication, and deployments with Docker and Linux. Seeking a junior full-stack or frontend developer role.

EXPERIENCE

Software Developer — Professional Internship II **Nov. 2024 – Mar. 2025**
CIMUBB, Universidad del Bío-Bío Concepción · Hybrid

- Modernized computer vision experiments with Python and OpenCV, improving stability and reducing detected failures by approximately 25%.
- Built an Android application with Chaquopy and OpenCV for real-time capture, cropping and classification, reducing the manual workflow from 6 to 2 steps.
- Implemented SQLite persistence with traceable history and standardized documentation and tests, reducing testing time by 30%.

Web Developer — Applied Project, Granja Santa Luisa **2025**
Process digitization for a poultry small business Concepción

- Gathered requirements from non-technical users and modeled inventory, sales and health-control workflows previously managed through manual records.
- Converted observed processes into modules, business rules and automations for the IECI Poultry Management System.

SELECTED PROJECTS

Industrial Commerce — Full-Stack B2B E-commerce **2026**
Next.js · TypeScript · Express · Supabase · Vercel

- Built a functional demo with a product catalog, direct purchasing, quotation requests and integrated business logic.
- Implemented an explorable read-only admin dashboard to demonstrate operations without exposing destructive actions.

Live demo · **Case study**

IECI Poultry Management System — Capstone Project **2025**
React · TypeScript · Node.js · Express · PostgreSQL · Supabase · Docker

- Designed and developed a SPA and REST API to centralize inventory, sales, health control and reporting across four modules.
- Implemented authentication, three roles, per-user traceability and access policies; prepared reproducible deployments with Docker, Debian, Nginx and PM2.

Source code · **Case study**

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Frontend & CMS: React, Next.js, HTML, CSS, WordPress
Backend & data: Node.js, Express, REST APIs, PostgreSQL, Supabase, SQLite
Tools: Git, GitHub, Docker, Linux, Nginx, PM2, BPMN, UML

EDUCATION

Universidad del Bío-Bío **2019 – Sep. 2025**
Computer Science and Information Technology Engineering
